Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to brightness and color temperature comparison with RGB signal generator and system controller, classified in class 345, subclass 589.
- II. Claims 15-23 and 28-35, drawn to the storage and detection of brightness and color temperature comparison, classified in class 345 subclass 593.
- III. Claims 24-25, drawn to storage and detection of brightness and color temperature comparison, temperature, classified in class 345, subclass 204.
- IV. Claims 26-27, drawn to a command applying unit providing references for brightness and color temperature, classified in class 345, subclass 747.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I, II, III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as claimed does not require the particulars of the subcombinations. The subcombination has separate utility such brightness and color temperature comparison

Art Unit: 2676

with RGB signal generator and system controller; storage and detection of brightness and color temperature comparison; storage and detection of brightness and color temperature comparison and a command applying unit providing references for brightness and color temperature.

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. During a telephone conversation with Mr. Paul Bobowiec, Reg. No. 47,431 on or about 16 December, 2004, Mr. Bobowiec requested that examiner send a written requirement for the benefit of the client.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ANTHONY J BLACKMAN whose telephone number is 703-305-0833. The examiner can normally be reached on FLEX SCHEDULE.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MATTHEW BELLA can be reached on 703-308-6829. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
